

## Task (Week 4 to 6)

Your task is to do a literature research about compliance in patient care in psychiatric institutions (clinics) in Europe. Focus on inpatient care. More specifically, compare the compliance culture in the 1970's and from 2000 to today.

The steps:

- Use internet search engines (like Google) as well as our literature search engines (like PubMed) or our library. Choose at least 3 sources which cover the 1970's and at least 3 sources which cover the time range from 2000 to today.
- Write a short summary for every source (200 words), cite the source according to APA guidelines as well as a personal review for every source (100 words). Use our criterion list for compliance which you got in Week 1.
- Write an overall review in which you compare the culture 30 years ago and the current culture.
- Export your review as PDF file, name it `firstname_familyname_Task.pdf` and upload it to OpenOLAT.
- Within a week, you will get a feedback about the quality of your result as well as a sample solution written by myself.

Deadline for uploading your result is the end of week 6!

Good luck!
